

NSRL

Pilot Plant and Test Kitchen

The NSRL Pilot Plant and Test Kitchen provides training, supports outreach efforts and serves as the only dedicated soy processing and utilization site and kitchen facility in the U.S. to over 1,100 this year.

Industry Partnerships and Training

- MicroSoy
- Bar N.A., Inc.
- Biodiesel Entrepreneurs and Start Up Operations
- FaifoSoy
- Sipani Krishi Anusandhan
- Element 79
- Aprosoja
- Private Industry Soy Product R&D

Visiting Researchers

- Texas A&M University
- Association of Oil Chemists
- Crop Life Foundation

International Development Training

- CNFA: Stimulating global economic growth & market development
- INTSOY: Soy Processing and Utilization Conference
- World Initiative for Soy in Human Health Midwest Workshop

Students Education and Support

- FSHN Food Processing Labs
- Sausage Processing
- Milling Whole Corn/Hammer Mill
- Extruding Proprietary Samples with Oil
- Extruder Production Training with Isolates
- Soy Dairy for Agricultural Economics Class

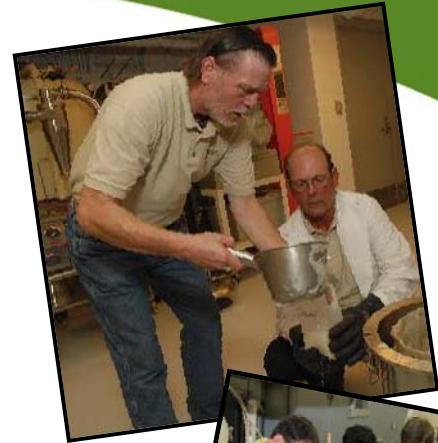

NSRL

Pilot Plant and Test Kitchen

Food Preparation and Soy Food Training

- Soy Lunches for Select Visitors
- Trainings for WISHH Midwest Workshop
- INTSOY: Soy Processing and Utilization Conference
- Media Outreach and Photo Shoots
- FaifoSoy
- Sipani Krishi Anusandhan

Soy Food Samples and Outreach Efforts

- Over 10,000 Cookies
- Soynuts
- Soy Smoothies
- Soy Outreach Product

Biodiesel Production Facility

- Production of 20 gallons per day
- Capability demonstrations
- Technical services and equipment training
- Ability to produce biodiesel from a variety of oils

Soy Dairy Western Hemisphere Training Center

- PVO and NGO Process Training
- Humanitarian Efforts including Rotary
- Equipment Use and Maintenance
- Product Development and Enhancement
- Country Support: Vietnam, Malawi, Taiwan, Brazil

Support for University and Illinois Soybean Association Events

- Salute to Ag Day
- Feed Your FACES
- Explore ACES
- Agronomy Day
- State Fair
